

Senior Medical Statistician

Location: Primrose Hill, London, UK; Newcastle-upon-Tyne, UK; Westport, Rep. of Ireland

Type: Permanent, primarily office-based but a home-based option will be considered for a suitable candidate

Salary: On application, and commensurate with experience

About the role

As a Senior Medical Statistician you will work with the cross-functional team to design and deliver innovative analytic solutions that support our clients in securing patient access to emerging medical technologies. You will lead the execution of analyses across to support the synthesis of evidence from multiple sources, to generate real-world evidence and to support the development of complex health economic models.

You will be provided with the opportunities and support to further develop your technical, strategic and management skills through both project work and dedicated training opportunities. Your development as a subject matter expert will be supported through the provision of opportunities to carry out methodological work and pursue publications in peer reviewed journals.

About PHMR

Established in 2007, we are a highly successful and energetic consultancy – a diverse group of well-recognised professional scientists, health economists, and industry specialists with a proven track record in providing global market access solutions to some of the biggest healthcare industries so that patients get access to medicines. Our science is internationally renowned, and we are proud of our work.

- We apply robust scientific approaches and methodologies. Quality science comes first.
- We combine the expertise of our team with a worldwide professional network.
- We continuously learn and improve.
- 90% of our projects are repeat or referral from our existing customers.
- Most of our team are educated to PhD level.
- We embrace diversity in all its forms.

Our culture is open, team-based and inclusive. We are creative, innovative, forward-thinking and truly operate as a team of people who enjoy spending time together. Our leadership team is always approachable and offers coaching and training opportunities to the less experienced staff. PHMR also values and recognises work life balance, thus provides flexibility and individual support to all its team members. We love being part of PHMR and perceive our culture to be vital to our success.

Requirements / performance dimensions:

Functional technical expertise

- Higher degree with a large statistical component (MMath/MSc/PhD)
- Experience within the pharmaceutical industry (pharma, biotech, CRO or consultancy)
- Extensive experience with statistical programming packages, particularly R and Stata
- Interest/ previous experience in biomedical statistics
- Familiarity with Health Technology Assessment agency guidelines for statistical methods
- Good understanding of clinical trials
- Ability to consistency lead one of the below activities with no supervision and an ability to carry out the other activities with some supervision:
 - Design and conduct of statistical analyses to synthesise data from multiple sources
 - (pairwise meta-analyses, mixed treatment comparisons/network meta-analyses, etc.)
 - Design studies using real world data, carry out the management and statistical analysis of real-world datasets
 - Design and conduct analyses of data to support other HEOR activities

Requirements / performance dimensions (continued):

- Ability to consistently lead one of the below activities with no supervision and an ability to carry out the other activities with minimal supervision:
 - Lead the oral communication and discussion of the study design and planned analyses, the interpretation of results overall and in the context of the client's goals and best approaches for dissemination of the findings
 - Draft client reports and scientific manuscripts clearly and accurately describing the context of the study, the methodological approach, the results obtained and the interpretation and discussion of the findings
 - Support the acquisition of new work by building our clients trust in our technical expertise, proposing studies/analyses to support their ongoing HEOR needs, and developing proposals which accurately set out the nature and scope of work required and the resultant resourcing and budgetary needs
- Tenacity and patience, to see research projects through from proposal to completion
- Good time management and organisational skills
