

Senior Health Economics & Real-World Evidence (HE-RWE) Scientist

Location: Primrose Hill, London, UK; Newcastle-upon-Tyne, UK; Westport, Rep. of Ireland

Type: Permanent, office-based

Salary: On application, and commensurate with experience

About PHMR

Established in 2007, we are a rapidly growing and energetic consultancy – a diverse group of professional scientists, health economists and industry specialists with a proven track record in providing global market access solutions to some of the biggest healthcare industries so that patients get access to medicines. Patients get access to medicines as a result of our work. Our science is internationally renowned, and we are proud of our work.

- We apply robust scientific approaches and methodologies. Quality science comes first.
- We combine the expertise of our team together with a worldwide professional network.
- We continuously learn and improve.
- 90% of our projects are repeat or referral from our existing customers.
- The majority of our team are educated to PhD level.
- We embrace diversity in all its forms.

We also love being part of an engaging, supportive team that combines having fun with striving for high quality science. Our leadership team is always approachable, and we find it easy to work with each other. The variety of our work is both challenging and exciting and helps us achieve our research and career ambitions. PHMR provides flexibility and individual support in order to help make our lives more balanced and enjoyable. We love being part of PHMR.

About the role

We are looking for a talented scientist with expertise in designing and executing real world evidence generation strategies to support our clients' HEOR, pricing and market access needs. The successful candidate will join our growing team and will play a key role in the acquisition, planning and management of PHMR research projects across a wide range of methodological and therapeutic areas, including oncology, infectious disease, cardiovascular disease, diagnostics, and neurological disorders. The Senior HE-RWE scientist position offers the opportunity to guide the development of evidence generation strategies that improve patient access to emerging medical technologies.

Key responsibilities:

- Lead the development of research questions, study protocols and statistical analysis plans for health economic and real-world evidence generation activities
- Lead and/or coordinate the management and analysis of real-world datasets to derive clinically and economically meaningful outputs
- Lead and contribute to the development of novel approaches to generate evidence to overcome current challenges in health technology assessment and market access
- Lead proactive business development activities including proposal development and client relationship building
- Independently manage assigned projects developing project outlines, scheduling interim deliverables and meeting final delivery dates
- Develop and prepare abstracts, manuscripts and/or presentations to conferences for internal and external projects
- Contribute to improving operational efficiencies of workflows, including writing of SOPs and quality management documents
- Lead or contribute to the writing of study reports and manuscripts
- Manage and mentor junior staff in developing their methodological expertise

Requirements / performance dimensions:

Functional technical expertise

Essential

- MPH, MSc or PhD (or an equivalent degree) in epidemiology, economics, statistics or a related discipline
- 5+ years post graduate experience in HEOR, market access or other aspects of drug development
- 2+ years post graduate experience designing and executing real world evidence generation activities to support HEOR, market access or other aspects of drug development
- Statistical programming experience in SAS, Stata, or R
- Experience working with large electronic health record datasets (e.g. CPRD, THIN, HES, etc.)
- Ability to effectively manage and juggle between multiple tasks and projects
- Ability to meet short deadlines with high quality results
- Project budgeting skills
- Effective team management experience
- Strong written and verbal communication skills, including presentation skills
- Ability to communicate complex technical issues to non-experts
- Excellent command of English, oral and written

Desirable

- Knowledge of basic principles of economics, HEOR and market access in key world markets
- Experience in planning and executing indirect treatment comparisons
- Experience planning and carrying out systematic reviews
- Publications in peer-reviewed journals and abstracts in scientific conferences
- Familiarity with economic modelling methodology

Alignment to PHMR values

- Integrity:** we do the right thing
- Quality focus:** we continually pursue excellence
- Ambitious:** we are tenacious and sustainable
- Collegiate:** we support and learn from each other
- Fun:** we enjoy our work

Strategic input

Client focus

Communication skills

Non-project contribution

Great to work with

Autonomy

Line management (desirable)

PHMR offer:

- Flexibility and individual support for more balanced and enjoyable life;
- Fantastic opportunities for professional development, working along industry experts;
- Tight-knit, collegiate office environment.

To apply for this position please submit your CV and covering letter explaining why you think you would be suited to the role and reasons for wishing to join our team to info@phmr.com.

Candidates wishing to discuss the position, please call +44 (0) 203 695 5807 for an informal chat with Dr Cormac Sammon (Chief Medical Officer/Senior Epidemiologist). *No agencies please.*

All candidates are eligible to apply for our roles and will be considered on suitability and merit throughout the recruitment process. However, at the time of starting their employment the successful candidate must have permission to work either in the Republic of Ireland or the United Kingdom depending on the location.
